

## Obama warns North Korea on rocket launch

SEOUL — Monday night's threat to launching an American missile against North Korea's nuclear program was met by Pyongyang with a statement of defiance and a threat to launch a missile. The statement said the country has prepared with a plan to launch a missile within 10 days.

North Korea said it will launch a missile by dawn on Wednesday, the statement said, adding a threat to launch a missile within 10 days.

# Shell, Petron get P2.8-B tax break

**By The Star Bureau**  
SHELL and PETRON have secured a P2.8-billion tax break from the government for their operations in the Philippines. The tax break, which is part of a larger P10-billion package, is the result of a long and arduous process that involved negotiations with the Department of Finance and the Bureau of Internal Revenue. The tax break is expected to significantly reduce the tax burden of the two companies, allowing them to invest more in their operations and expand their market share in the Philippines.

The tax break is part of a larger P10-billion package that is being distributed among several other companies. The package is being distributed in a way that is intended to be fair and equitable to all companies that are eligible for the tax break. The tax break is expected to be a significant boost for the Philippine economy, as it will allow companies to invest more in their operations and create more jobs.

The tax break is a significant victory for Shell and Petron, as it will allow them to significantly reduce their tax burden. The tax break is also a victory for the Philippine government, as it will allow it to collect more taxes from other companies. The tax break is a win-win situation for everyone involved.

## Palace ignores envoy's stance on sex tourism

THE PALACE has ignored the stance of its Philippine ambassador in Bangkok on sex tourism. The ambassador, who is a member of the Philippine Commission on Women, has been vocal in his opposition to sex tourism. He has stated that sex tourism is a violation of the rights of women and that it is a form of exploitation. The Palace, however, has not taken any action to support the ambassador's stance. This has led to criticism from the public and from other members of the Philippine Commission on Women.

## Gov't to finance mining education

THE GOVERNMENT has announced that it will finance mining education. This is a significant step, as it will allow more people to receive education in the mining industry. The government has stated that it will provide financial support for mining education in the form of scholarships and grants. This will help to reduce the financial burden on students and will encourage more people to pursue education in the mining industry.

But this study raises a question: how can we best protect the environment? The authors suggest that the best way to protect the environment is to reduce the amount of waste we produce. This can be done by recycling, reusing, and reducing. The authors also suggest that we should use public transportation, carpool, and walk or bike to work. These are all ways to reduce the amount of waste we produce and the amount of pollution we create. The authors conclude that the best way to protect the environment is to reduce the amount of waste we produce and the amount of pollution we create.

# Gov't OKs 3 rice-sufficiency projects

By Ruffalo L. Sison

THE 10th Congress endorsed three world-class rice-sufficiency projects and made it easier to finance them through the Philippine Development Bank (PDB).

Specifically, the House of Representatives approved the rice-sufficiency projects under the Philippine Development Bank (PDB) bill, which is to be passed by the Senate and signed by President Benigno Aquino III.

The projects are: the rice-sufficiency project in the Philippines, the rice-sufficiency project in the Philippines, and the rice-sufficiency project in the Philippines.

The projects are to be implemented by the Philippine Development Bank (PDB) and the Philippine Development Bank (PDB).

The projects are to be implemented by the Philippine Development Bank (PDB) and the Philippine Development Bank (PDB).

# US to help PH make TB thing of the past

By Nels G. Bialos

THE PHILIPPINE GOVERNMENT has secured a \$100-million grant from the United States to help it fight tuberculosis (TB) and other infectious diseases.

The grant, which is the largest ever awarded by the US to the Philippines, will be used to support the country's efforts to combat TB, HIV/AIDS, malaria, and other infectious diseases.

The grant will be used to support the country's efforts to combat TB, HIV/AIDS, malaria, and other infectious diseases.

## Court of cartwheels

**D**URING THE RECENT session of the Supreme Court, the justices were faced with a case that was as much a test of their wisdom as it was of their courage. The case involved the issue of the validity of the 1987 Constitution, a question that has been the subject of much speculation and debate. The court's decision, which was a 6-3 majority, was a landmark one, as it affirmed the constitutionality of the 1987 Constitution. This decision was a victory for the people, as it ensured the continuity of the democratic process in the Philippines.

The court's decision was a testament to the resilience of the Philippine judiciary. It showed that the justices were willing to stand up to political pressure and make a decision based on the law. This was a rare display of judicial independence in a country where the executive and legislative branches have often sought to undermine the judiciary. The decision also sent a strong message to the people that the rule of law is still the guiding principle of the Philippine government.

The court's decision was a source of relief for many Filipinos who had been worried about the future of the 1987 Constitution. It showed that the constitution was still a living document, one that could be interpreted and applied in a way that was consistent with the values and principles of the Philippine people. This was a reassuring sign that the democratic process was still alive and well in the Philippines.

The court's decision was also a source of inspiration for many Filipinos who were fighting for democracy and human rights. It showed that the judiciary could be a powerful force for change, one that could stand up to the most powerful branches of government and make a difference. This was a message that was needed in a country where the rule of law had been so often violated.

The court's decision was a landmark one, as it affirmed the constitutionality of the 1987 Constitution. # PH economy booms despite 'Noynoying'

**By [illegible]**

Despite the political uncertainty surrounding the administration of President Benigno Aquino III, the Philippine economy has continued to grow at a steady pace, according to the latest data from the Department of Trade and Industry (DTI).

The DTI reported that the Philippine economy grew by 7.6 percent in the third quarter of 2015, compared to 7.5 percent in the same quarter last year. This growth was driven by a strong performance in the services sector, which contributed 8.1 percent to the overall growth.

The manufacturing sector also showed signs of recovery, growing by 2.1 percent, while the construction sector grew by 1.2 percent. The agriculture, forestry and fishing sector, however, experienced a slight decline of 0.5 percent.

The DTI attributed the strong growth in the services sector to a combination of factors, including a recovery in the tourism industry, a rebound in the retail sector, and a strong performance in the business process outsourcing (BPO) industry.

Despite the political challenges, the DTI remains optimistic about the future of the Philippine economy, citing the country's strong fundamentals, a young and growing population, and a favorable investment environment.

# CALOOCAN MAYOR'S RECOMMENDATION

## 'Shut down burnt mall'

The Caloocan Mayor's Office has recommended the shutdown of the burnt mall in Caloocan City. The mall, which was built in 1998, was destroyed by a fire that broke out on the night of January 1, 2012. The fire caused the death of 10 people and injured 15 others. The mall was owned by a private company and was used as a shopping center. The fire was caused by a short circuit in the electrical system. The mall was built on a hillside and was surrounded by trees. The fire spread quickly and was difficult to contain. The mall was destroyed almost completely. The fire was caused by a short circuit in the electrical system. The mall was built on a hillside and was surrounded by trees. The fire spread quickly and was difficult to contain. The mall was destroyed almost completely.

## 2 La Salle-Dasmar beach volley learns gain Boracay nat'l finals

**Magnum's not a 4-card bluff**  
 where they all sit at the table.

1. The first step is to identify the variables in the model. In this case, the variables are:
 

- Dependent variable:  $Y$
- Independent variable:  $X$
- Control variables:  $Z_1, Z_2, \dots, Z_k$

2. The second step is to specify the functional form of the relationship between the variables. This is typically done using a linear model:
 
$$Y = \beta_0 + \beta_1 X + \beta_2 Z_1 + \beta_3 Z_2 + \dots + \beta_{k+1} Z_k + \epsilon$$

3. The third step is to estimate the parameters of the model. This is done using ordinary least squares (OLS) regression. The OLS estimator for the parameters is given by:
 
$$\hat{\beta} = (X'X)^{-1}X'Y$$

4. The fourth step is to test the hypotheses. This is done using t-tests and F-tests. The t-test is used to test the significance of individual coefficients, while the F-test is used to test the significance of the entire model.

## Shift to digital television seen happening by '16

Industry players await decision on PH standards

By Phil S. Mindes

MANILA, Philippines — The Philippine television industry is waiting for a decision from the National Telecommunications Commission (NTC) on whether to adopt digital television standards by 2016. Industry players are currently in a state of uncertainty, with some favoring the adoption of digital standards and others favoring the continuation of analog standards. The NTC is expected to make a decision on this issue in the near future.

PH companies explore deals with Taiwan firms

MANILA, Philippines — Philippine companies are exploring potential deals with Taiwan firms, particularly in the areas of technology and infrastructure. The Philippine government has expressed interest in strengthening its economic ties with Taiwan, and several private sector companies are looking for opportunities to collaborate with Taiwanese firms. These deals could range from joint ventures to outright acquisitions, and they could have a significant impact on the Philippine economy.

### Berjaya scholars study in 5-star KL facilities

Figure 1 consists of 16 micrographs arranged in a 4x4 grid. The rows represent different bacterial strains (ATCC 27853, ATCC 27853, ATCC 27853, ATCC 27853) and the columns represent different treatments (Control, 100 µg/ml, 200 µg/ml, 400 µg/ml). The micrographs show varying degrees of bacterial growth inhibition, with the 400 µg/ml treatment showing the most significant reduction in growth.

# ICT may chip in as much as \$50B to local economy

By Rose E. Hernandez

THE CONTRIBUTION of the information and communications technology (ICT) sector to the local economy is projected to reach as high as \$50 billion by 2015, according to a report by the Department of Information and Communications Technology (DICT). The report, titled "ICT Sector's Contribution to the Philippine Economy," was released last week. It shows that the ICT sector has grown by 10.5 percent in 2010, contributing to the overall economic growth of the country. The report also highlights the potential of the ICT sector to create jobs and improve the quality of life of Filipinos.

The report states that the ICT sector is one of the fastest-growing sectors in the Philippines. It is expected to continue its rapid growth in the coming years, driven by the increasing demand for digital services and the expansion of the ICT infrastructure. The report also notes that the ICT sector has a high multiplier effect, meaning that it can generate a significant amount of economic activity for every dollar invested. This is due to the fact that the ICT sector is highly interconnected with other sectors of the economy, such as manufacturing, services, and agriculture.

# Combined income of PH banks hit P96B in 2011

Expansive growth spurs demand for bank services

By Michael T. Sison

THE COMBINED income of the 10 largest banks in the Philippines reached a record high of P96 billion in 2011, up from P88 billion in 2010, according to a report by the Bangko Sentral ng Pilipinas (BSP). The report, titled "Annual Report on the Philippine Banking Industry," was released last week. It shows that the banking industry has experienced strong growth in 2011, driven by the increasing demand for bank services and the expansion of the banking infrastructure. The report also highlights the potential of the banking industry to create jobs and improve the quality of life of Filipinos.

The report states that the banking industry is one of the most important sectors in the Philippines. It is responsible for providing financial services to businesses and individuals, and for facilitating the flow of capital in the economy. The report also notes that the banking industry has a high multiplier effect, meaning that it can generate a significant amount of economic activity for every dollar invested. This is due to the fact that the banking industry is highly interconnected with other sectors of the economy, such as manufacturing, services, and agriculture.

The report also highlights the potential of the banking industry to create jobs and improve the quality of life of Filipinos. This is due to the fact that the banking industry is highly interconnected with other sectors of the economy, such as manufacturing, services, and agriculture.

# PH companies explore deals

PHILIPPINE COMPANIES are exploring deals with foreign investors to expand their operations and improve their financial performance. This is according to a report by the Department of Trade and Industry (DTI). The report, titled "Foreign Investment in the Philippines," was released last week. It shows that the Philippines has attracted a significant amount of foreign investment in recent years, and that this trend is expected to continue in the coming years. The report also highlights the potential of the Philippines to attract more foreign investment, particularly in the ICT and manufacturing sectors.

The report states that the Philippines has a competitive advantage in the ICT and manufacturing sectors, which makes it an attractive destination for foreign investment. It also notes that the Philippines has a large and growing market, which provides a significant opportunity for foreign investors to expand their operations. The report also highlights the potential of the Philippines to attract more foreign investment, particularly in the ICT and manufacturing sectors.

The report also highlights the potential of the Philippines to attract more foreign investment, particularly in the ICT and manufacturing sectors. It notes that the Philippines has a competitive advantage in the ICT and manufacturing sectors, which makes it an attractive destination for foreign investment. It also notes that the Philippines has a large and growing market, which provides a significant opportunity for foreign investors to expand their operations.

## P68B needed to address rising energy demand, study shows

By Ann R. Stone

MANILA, Jan. 3 — A study by the Asian Development Bank (ADB) shows that the Philippines needs to invest P68 billion in power infrastructure to meet the growing demand for electricity by 2030. The study, titled "Power Sector Development Strategy for the Philippines," was released last week. It found that the country's power supply is inadequate to meet the growing demand, particularly in the industrial and commercial sectors. The ADB estimates that the Philippines will need to add 10,000 megawatts of generating capacity by 2030. To meet this demand, the country needs to invest in a mix of renewable and non-renewable energy sources. The study also highlights the need for improved power distribution and transmission infrastructure. The ADB is providing technical assistance to the Philippine government to develop a comprehensive power sector development strategy.

## Banks' real estate exposure up 20%

BSP: Rising household incomes led to record borrowing

MANILA, Jan. 3 — The Bangko Sentral ng Pilipinas (BSP) reported that the real estate exposure of banks has increased by 20 percent in the first quarter of 2013. The BSP said that the increase was driven by a rise in household incomes and a corresponding increase in borrowing for real estate. The BSP also noted that the real estate sector remains a key area of focus for the central bank, particularly in terms of monitoring credit growth and ensuring the stability of the financial system. The BSP will continue to monitor the real estate market closely and take appropriate measures to maintain financial stability.

The diagram shows two columns representing different network states. The left column has a smaller number of neurons ( $N$ ) and a lower number of synapses per neuron ( $S$ ). The right column has a larger number of neurons ( $N$ ) and a higher number of synapses per neuron ( $S$ ). Arrows indicate the transition from the left state to the right state, suggesting an increase in both parameters.

Ironing for a job<sup>2</sup>

JUDGE VICENTE S. PULIDO

[illegible]

11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50	51	52	53	54	55	56	57	58	59	60	61	62	63	64	65	66	67	68	69	70	71	72	73	74	75	76	77	78	79	80	81	82	83	84	85	86	87	88	89	90	91	92	93	94	95	96	97	98	99	100
----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	-----

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and faint smudges, characteristic of old paper. The left edge of the page is bound, showing the stitching and the inner cover material. There is no text or other markings on the page.

*[The page contains extremely faint, illegible markings and bleed-through from the reverse side.]*

[illegible][illegible]

The collage consists of several distinct advertisements:

- Top Left:** A small ad for a car, possibly a Honda Civic, with text in Japanese and English.
- Top Center:** A large ad for a car, featuring the text "Honda Civic" and "1.8i" in English, with Japanese text above and below.
- Top Right:** A small ad for a car, possibly a Nissan Skyline, with text in Japanese and English.
- Middle Left:** A small ad for a car, possibly a Toyota Camry, with text in Japanese and English.
- Middle Center:** A large ad for a car, featuring the text "Nissan Skyline" and "2.5i" in English, with Japanese text above and below.
- Middle Right:** A small ad for a car, possibly a Toyota Camry, with text in Japanese and English.
- Bottom Left:** A small ad for a car, possibly a Toyota Camry, with text in Japanese and English.
- Bottom Center:** A large ad for a Japanese restaurant, featuring a portrait of a chef and text in Japanese and English.
- Bottom Right:** A small ad for a car, possibly a Toyota Camry, with text in Japanese and English.

[illegible]

The collage consists of several small, overlapping newspaper advertisements. On the left, a prominent black box contains the text 'CASH-PAID' in white. Below it, there's a small ad for 'WOMAN' with a picture of a woman. To the right, there's an ad for 'Piano-Fire' with a picture of a piano. Other smaller, less legible ads are visible in the background, including one for 'The New York Times' and another for 'The Washington Post'.

## 'Bototoy' exhibit focuses on toy-art hybrid

By Karin James

**T**he exhibit is a collection of 100 hand-painted, custom-made toys that are designed to look like they were made by a child. The toys are made from a variety of materials, including wood, metal, and plastic. They are painted in a variety of colors and styles, and some are even made to look like they are made from recycled materials.

All that's happening  
now is for the best

**Do You Have Plans?**

I like Fido. He's fluffy and cute.

1. The first part of the text discusses the importance of understanding the local market and the needs of the community. It emphasizes that a successful business must be able to adapt to the specific conditions of the area in which it operates.

2. The second part of the text focuses on the role of the entrepreneur. It argues that the entrepreneur must be able to identify opportunities, take risks, and manage resources effectively. It also stresses the importance of having a clear vision and a strong commitment to the business.

3. The third part of the text discusses the challenges of starting a business. It highlights the need for capital, the importance of a solid business plan, and the necessity of having a supportive network. It also mentions the importance of understanding the legal and regulatory environment.

4. The fourth part of the text discusses the importance of marketing and sales. It argues that a business must be able to reach its target market and convert leads into customers. It also stresses the importance of providing excellent customer service and building a strong brand.

5. The fifth part of the text discusses the importance of financial management. It argues that a business must be able to manage its cash flow, control its costs, and maintain accurate financial records. It also stresses the importance of having a clear understanding of the business's financial health.

6. The sixth part of the text discusses the importance of human resources. It argues that a business must be able to attract, hire, and retain talented employees. It also stresses the importance of providing training and development opportunities and creating a positive work environment.

7. The seventh part of the text discusses the importance of innovation and research and development. It argues that a business must be able to stay ahead of the competition by developing new products and services. It also stresses the importance of investing in research and development.

8. The eighth part of the text discusses the importance of social responsibility. It argues that a business must be able to contribute to the community and the environment. It also stresses the importance of being transparent and accountable.

9. The ninth part of the text discusses the importance of networking and building relationships. It argues that a business must be able to build a strong network of contacts and partners. It also stresses the importance of being a good listener and a good communicator.

10. The tenth part of the text discusses the importance of perseverance and resilience. It argues that a business must be able to withstand challenges and setbacks. It also stresses the importance of staying motivated and focused.

Figure 1 consists of two scatter plots. The left plot shows a positive correlation between the number of children and the number of children in the household. The right plot shows a negative correlation between the number of children and the number of children in the household.

The diagram shows a top-down view of the experimental setup. A subject is seated at a table, looking at a video screen. A camera is positioned above the screen. A target is placed on the table. A light source is positioned to the left of the target. A scale bar is visible on the table.

Figure 1 consists of two histograms. The left histogram is for matrix A (size 10000x10000) and the right is for matrix B (size 10000x10000). Both histograms show the distribution of the number of non-zero elements. The x-axis represents the number of non-zero elements, ranging from 0 to 10000. The y-axis represents the frequency, ranging from 0 to 100. Both distributions are unimodal and centered around 1000 non-zero elements.

## FWU holds 87th baccalaureate and commencement rites

Figure 1 consists of two panels. The left panel is a line graph showing the release of  $^{125}\text{I}$ -angiotensin II over time (0 to 120 minutes). The y-axis represents the amount of  $^{125}\text{I}$ -angiotensin II released (pmol). The x-axis represents time (min). The release increases over time, with a significant increase observed after 60 minutes. The right panel is a line graph showing the effect of 100%  $\text{O}_2$  on the release of  $^{125}\text{I}$ -angiotensin II. The y-axis represents the amount of  $^{125}\text{I}$ -angiotensin II released (pmol). The x-axis represents the percentage of  $\text{O}_2$  (0 to 100%). The release increases as the percentage of  $\text{O}_2$  increases, with a significant increase observed at 100%  $\text{O}_2$ .

Figure 1 is a line graph titled "Percentage of respondents who believe that the U.S. should take action to reduce global warming, broken down by age group." The x-axis represents age groups: 18-29, 30-49, 50-69, and 70+. The y-axis represents the percentage of respondents, ranging from 0 to 100 in increments of 20. The graph shows four data points connected by lines, representing the percentage of respondents in each age group who believe the U.S. should take action. The percentages are approximately: 18-29 (65%), 30-49 (75%), 50-69 (80%), and 70+ (85%).

Age Group	Percentage of respondents who believe that the U.S. should take action to reduce global warming
18-29	65%
30-49	75%
50-69	80%
70+	85%

1991. *Journal of the American Academy of Child and Adolescent Psychiatry* 30:103-110.

Figure 1 is a line graph showing the effect of the concentration of the initiator on the polymerization of 1,3-bis(4-vinylphenyl)propane (1,3-BVP) in benzene at 60°C. The x-axis represents the concentration of the initiator in mol/L, ranging from 0.001 to 0.1. The y-axis represents the degree of polymerization (DP), ranging from 0 to 100. The curve shows a sharp increase in DP from 0 to about 80 as the initiator concentration increases from 0.001 to 0.002 mol/L, followed by a gradual increase to about 95 at 0.01 mol/L, and then a slight decrease to about 90 at 0.1 mol/L.

PL 54 is a dark bl. or a brown

The figure is a 3D scatter plot with three axes labeled  $X_1$ ,  $X_2$ , and  $X_3$ . The  $X_1$  axis ranges from 0 to 100, the  $X_2$  axis from 0 to 100, and the  $X_3$  axis from 0 to 100. The data points are represented by small circles and are distributed in a complex, non-linear pattern, forming a shape that resembles a distorted cube or a complex manifold. The points are more densely packed in some regions than others, indicating a non-uniform distribution.

Figure 1. A schematic diagram of the experimental setup. The subject is seated in a chair and views the target through a video camera. The target is a light source that is controlled by a computer. The subject's hand is positioned over the target. The video camera is positioned above the target. The computer is connected to the video camera and the target. The subject is instructed to move their hand towards the target when the light source is turned on.

Superior Learning Experience

# CIMA. Helping educators thrive in a hyperconnected world

As the world's leading association of business schools, CIMA is committed to helping educators thrive in a hyperconnected world. We provide a range of services and resources to support our members, including access to a global network of peers, expert advice and support, and a range of training and development opportunities. We also offer a range of services and resources to support our members, including access to a global network of peers, expert advice and support, and a range of training and development opportunities.

## Interactive and collaborative programs for today's new breed of learners

As the world's leading association of business schools, CIMA is committed to helping educators thrive in a hyperconnected world. We provide a range of services and resources to support our members, including access to a global network of peers, expert advice and support, and a range of training and development opportunities. We also offer a range of services and resources to support our members, including access to a global network of peers, expert advice and support, and a range of training and development opportunities.
